Activities towards maintenance of quality & training to therapist

As Shalakyatantra is the branch concerned with Eye, ENT & Dentistry all the sense organs- delicate organs. The main treatment modalities includes Nasya, Tarpan, Karnapooran, Anjan etc. So Hygiene & aseptic precautions must be at the priority.

To maintain all these things therapist, Nurses and Paramedical staffs are trained time to time with live demonstrations, models etc.

Knowledge regarding the complications of these procedures is also given to them.

All the therapists are trained to prepare the things like urad pali, Aushadi kalpas like kwath ,Putpak required for kriyakalpas.

All the therapists are trained to maintain the instruments, equipments clean and hygienic.
