**Details of New initiation in administering kriyakalpa procedures.**

- We use Swimming goggles for Netratarpan instead of Conventional methods ( Urad pali) to make the procedure easy.
- Sterilization is given First priority during the procedures particularly in eyes.
- Special Panchkarma sheet is prepared for Shalakyatantra procedures like Tarpan, Putapaka, Ashchyotan- Parisheka, Nasya, Karnapooran etc.
- Raktamokshan is also done with Syringe, Needles, Vacuum pumps instead of Previous conventional methods.
- For Karnapooran we use Syringe instead of Gokarna yantra.
- Eye wash cup is use for Netradhawan instead of conventional method.
- All the preparation like Kwath, Swaras are prepared Freshly with supervision & Standardization is done to asses PH of drugs for Better tolerance.
